Press Release

ESPION International, Inc. Introduces Encrypted Email HIPAA Compliance product at Email Security Shows

Costa Mesa, CA. November 18, 2005 : ESPION International, Inc. [EPLJ.PK], the maker of A.I. Based email gateway and network security products introduced it's newest product for encryption [MX] Lock, at the Email Security Seminars suite sponsored by Tech Target in Boston, Totonto, and Chicago recently. The [MX] Lock product offers secure, encrypted email that meets stringent HIPAA requirements. "Based upon initial feedback and indications of interest from numerous prospective clients, we consider this a very successful first public showing of our secure email product," said Ron Kaufman, ESPION's Chief Operating Officer.

ESPION's Chief Executive Officer Drew Burdsall states, "We were anticipating a solid showing and reception of the product, [MX] Lock, but the feedback thus far has been overwhelmingly positive and far exceeded our expectations". Mr. Burdsall continued, "based upon our meetings at these conferences, we expect to announce several new marquee clients to add to ESPION's already rich client base in the Health Care and Financial services industries, also as a result of the meetings are hoping to announce a partnering agreement with a leader in the email security space."

"The Research and Development team has been testing and refining the [MX] Lock product suite, and it was our great pleasure to introduce this product to such receptive crowds", commented Muralidar Chakravarthi, ESPION's Chief Technology Officer. "The proprietary technology incorporated in the [MX] Lock appliance has been very successful in early adopters of the product, and we look forward to meeting the needs of organizations faced with the daunting task of meeting government regulations such as HIPAA and GLBA", stated Mr. Chakravarthi.
